ENVIRONMENTAL POLICY

IES Limited aim to provide specialist consultancy, waste management and disposal services to the highest standard working within all current governing legislation. IES are committed to the prevention of pollution to land, air and water and carbon reduction, continually striving to improve our environmental performance, and compliance with all relevant legal and other requirements.

To ensure continual environmental improvement is achieved IES will:

- Operate in accordance with all relevant legislation applicable to our activities.
- Consider and manage the environmental aspects of IES's activities and services to minimise their impact on the environment.
- Understand and control the risks of our operations to minimise damaging incidents, environmental pollution.
- Work with customers to reduce any environmental impact of their operations.
- Continually assess the environmental impact of existing and new operations and services to achieve the highest standards.
- Implement and monitor programmes to ensure that the operations have minimal environmental impact on the amenities in the locality.
- Work with key suppliers to take full account of the environmental impact of the supply chain.
- Have sufficient knowledge to meet responsibilities in safeguarding the environment and possess some sensitivity towards environmental issues.
- Identify, set, monitor and review targets for our environmental performance including, but not limited to energy use, emissions, recycling and waste production.
- Where possible IES strive to recover or recycle our customer's wastes.
- Make this policy publicly available.
- Review this policy on an annual basis.
